

VIP WhatsApp Onboarding Scripts (Premium Tier)

If you offered "VIP WhatsApp Support" in your Premium plan, the key to fulfilling this without losing your mind (or your time) is *proactive, templated messaging*.

Use these copy-paste scripts to send to your Premium buyers. It makes them feel incredibly cared for while taking you only 2 minutes a day.

1. Day 0: The Welcome Message (Send immediately after purchase)

When to send: Within 2 hours of their purchase.

Goal: Establish trust, deliver the products, and set boundaries.

Script:

"Namaste [Customer Name]! ■

Welcome to the Diabetic-Friendly Indian Recipe family! I am so excited to help you and your family on this journey toward stable blood sugar and healthier living.

Here are all your VIP Premium links:

■ The 100+ Recipe eBook: [Link]

■■ 30-Day Meal Planner: [Link]

■ Grocery & GI Cheat Sheets: [Link]

■■ 15-Min Cooking Guide: [Link]

How this WhatsApp Support works:

You can message me here anytime you have a question about a recipe, an ingredient swap, or how to follow the meal planner. I check my messages once a day in the afternoon, so please give me 24 hours to reply!

Your first homework: Open the 'Smart Grocery Shopping List' and check what items you need to buy this weekend.

Let's do this! ■"

2. Day 3: The Check-in

When to send: 3 days after purchase.

Goal: Ensure they are actually using the product (reduces refunds).

Script:

"Hi [Customer Name]! Just checking in. Have you decided which recipe you are going to cook first?"

If you are confused about where to start, I highly recommend making the 'Besan Chilla with Paneer' for breakfast tomorrow! It takes only 10 minutes and keeps blood sugar incredibly flat.

Let me know if you need help finding ingredients! ■"

3. Day 7: The Motivation Booster

When to send: 1 week after purchase.

Goal: Build a relationship and encourage them.

Script:

"Happy 1-Week Anniversary, [Customer Name]! ■"

I hope the meal planner has been helpful. Remember, you don't have to be 100% perfect. Even replacing 1 bad meal a day with one of our low-GI recipes is a massive win for your pancreas.

How are your energy levels feeling this week? Any questions about the recipes so far?"

4. The FAQ Responses (Save these in WhatsApp Business Quick Replies)

If they ask: "Can I eat potatoes?"

"Hi! Potatoes (Aloo) have a very high Glycemic Index and will spike your sugar quickly. I highly recommend swapping them with Sweet Potatoes (Shakarkandi) in moderation, or better yet, using raw bananas (Kaccha Kela) in curries which behave very similarly but have a lower GI!"

If they ask: "Can I use Jaggery (Gud) instead of Sugar?"

"This is a common myth! Unfortunately, Gud and Honey spike blood sugar almost exactly the same way white sugar does. For your teas and sweets, I highly recommend using Stevia drops or Erythritol. They are safe, natural, and have zero impact on blood sugar."

If they ask: "I don't like X ingredient, what can I use?"

"No problem! You can easily swap that out. As a general rule, you can swap any green vegetable with another green vegetable (e.g., Palak for Methi), or any protein with another protein (e.g., Paneer for Tofu or Soya). Let me know the specific recipe and I'll give you a replacement!"

■ Support Boundary Rules for You

1. **Never give medical advice.** Always state: **"I can help with the recipes, but please consult your doctor regarding your insulin dosage or medication."**
2. **Set a specific time.** Only reply to messages between 4 PM and 5 PM. If you reply instantly all day, they will treat you like a 24/7 chatbot.
3. **Use Voice Notes:** A 15-second voice note saying "Hi Priya, yes you can use Jowar instead of Bajra!" builds massive trust and takes less time than typing.
