

The "Zero-Thinking" 90-Day Master Meal Plan

Your exact day-by-day protocol to stable fasting sugar.

The Secret Swap VIP System

Welcome to Your 90-Day Transformation

The goal of this plan is not to give you 90 different days of complex cooking. The goal is **Consistency, Simplicity, and Total Sugar Control**.

We use a **4-Week Rotating Matrix**. You will cycle through these 4 weeks three times. Research shows that eating similar meals makes tracking easier, reduces grocery waste, and stabilizes blood sugar faster than eating something completely new every day.

The 3 Golden Rules

1. **Never skip breakfast.** Eat within 60 minutes of waking up to prevent liver-dump sugar spikes.
2. **Follow the sequence:** Always eat your salad/veggies first, protein second, and roti/rice last.
3. **Drink water:** Drink 1 glass of water 15 minutes before every major meal.

Pro Tip: You can swap any Lunch and Dinner on the same day if you prefer. All meals are calibrated for a balanced glycemic load.
